For post sale enquiries:

Tel: **01282 446789**

Fax: **01282 418026**

Email: **info@ultra-finishing.co.uk**

Icon Guide

Made in Britain

Products have been made in Britain and adhere to the requirements of the 'Made in Britain' scheme.

Water Pressure

LP1 - 0.1 bar minimum
LP2 - 0.2 bar minimum
MP - 0.5 bar minimum
HP1 - 1 bar minimum
HP2 - 2 bar minimum

Guarantee

We offer a 10-year guarantee, unless otherwise stated, against manufacturing defects on all products when used in normal domestic applications (excluding serviceable parts, neglect or abuse). Additionally, we guarantee the surface finishing for ten years on chrome, unless otherwise stated.

EasyFit

Our enclosures feature EasyFit design, making them quick & simple to install

Anti Scald

Thermostatic cartridges ensure that the tap or shower will not exceed the maximum temperature, giving protection against accidental scalding.

Audio USB Port

Bring the sound of music to your bathroom with the Portal mirror with USB port and speakers.

Innovation

These products represent the latest in design to bring your bathroom right up to date.

100% Recyclable

Our Pioneer shower valve is manufactured from high grade engineered polymer which can be completely recycled.

Comfort Height

Some of our pans are slightly taller, making them more comfortable to use.

Maintain with Easy Access

Our Universal Access concealed cistern has an access panel at the front, meaning it can be repaired or maintained simply by removing the front panel of the back to wall unit.

Bulb Information

This symbol displays the bulb type required should you need to replace the bulb in your mirror.

Safety Glass

Our mirrors and cabinets have film backed glass for added safety.

Shower Shield

Our wetrooms and enclosures have a transparent easyclean coating which repels water and limescale.

ETERNALITE Eternalite

The Eternalite finish is available on our baths and ensures a rigid, super-strong bath which retains heat for up to 30 minutes longer than a standard bath.

WRAS

Appropriate products have been extensively tested by the WRAS and are approved or pending approval to comply with the Water Regulations Advisory Scheme.

TMV2

The Government recommends the use of thermostatic mixing valves (TMVs) for baths, taps and showers for all housing. TMV2 Certified valves maintain the pre-set temperatures even if the water pressure varies when other appliances are used, preventing domestic hot water scalding.

TMV3

TMV3 valves are engineered to a high standard so that they meet Government Health and Safety requirements for use in public places such as schools, hospitals, offices etc. and would significantly reduce the risk of scalds occurring in the home or anywhere that hot water is delivered through mixing valves.

Why choose Ultra?

Our ability to offer the most popular styles at affordable prices has seen Ultra become of the biggest and well established bathroom brands in the UK.

As one of the UK's fastest growing suppliers of bathroom products, the key to our success is simple - we have rapidly expanded into exciting new product groups to be at the forefront of the market.

The Company began life in 1982, and three decades of manufacturing experience has provided us with extensive market knowledge and the ability to offer new products at the right price.

Ultra has evolved into one of the country's largest independent suppliers of showers, enclosures, taps, furniture, mirrors and designer radiators. Significant growth over the last 30 years has seen Ultra expand from a small operation in a former air-raid shelter to modern premises - boasting a state-of-the-art distribution centre employing more than 150 people.

At Ultra, we ensure that you can have the latest bathroom designs, manufactured to the highest standards - and all at affordable prices.

We want to make choosing a bathroom easy for you - by offering co-ordinating taps and showers, baths with optional 'Eternalite' finish to make them stronger and retain heat for longer, and thermostatic showers which provide anti-scald protection for all the family.

We also provide easy-fit enclosures which are easy to install, stylish but functional furniture with soft-close doors and drawers, mirrors with handy features such as shaving sockets, de-mister pads and great lighting effects, plus radiator designs which range from heating a whole room to giving the luxury of warm towels.

Exceptional quality is one of the key factors to our success, so we strive to ensure that our products reach the highest industry standards possible.

We have achieved many widely recognised approvals such as TMV2, TMV3, WRAS and we are proud to be members of the 'Made in Britain' scheme.

Our sanitaryware is made from high quality vitreous china, shower enclosures feature 8mm toughened safety glass, and our taps feature ceramic disc technology which are tested to ensure smooth operation for a decade - and all of these fantastic features are backed by our market leading guarantees to give you peace of mind.

Made in Britain

We are proud to be members of the Made in Britain scheme;

VALQUEST

Our shower valves are manufactured at our factory in Burnley, using the patented Valquest cartridge. The showers are assembled in our dedicated production area and are tested on-site using our state of the art testing facilities.

Our futuristic Pioneer shower valves are also made in Britain, using high grade engineered polymer.

The popular Pearlstone shower trays are manufactured at our Halifax site, using a patented formula making them strong but up to 50% lighter than conventional stone resin trays.

ETERNALITE

Our whole bath range is now made in Britain, including the models with Eternalite finish and the new designs introduced for 2014.
